DEKKO Concrete is a team of dedicated professionals who design and fabricate sustainable lightweight concrete fire pits, mantels, cladding and architectural decor pieces that embody the highest level of quality, design and Canadian craftsmanship.

Our Proprietary Material is less than half the weight of regular concrete. Strength and durability are uncompromised rendering a product that is weather resistant, and able to take extreme heat and cold.

From colour to detailed finish, real quality is in our foundation. Each product receives the same care and attention to detail that can only be achieved through hand craftsmanship. This guarantees that every piece is truly unique.

Custom Design is available and allows us to make almost anything you can imagine. There are no limits. Be amazed at the beauty of our concrete.
